WHITEPAPER

KatDog

DISCLAIMER

This introductory paper was originally published in 2021 prior to the project's launch. It's worth noting that KATDOG, like all community-driven, open-source software projects, has evolved since its initial publication.

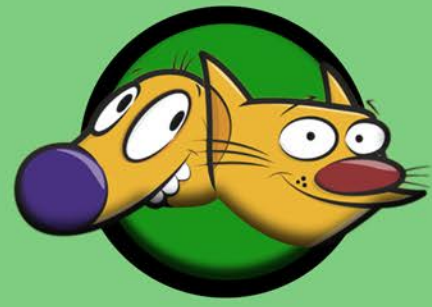

KATDOG is a completely decentralized and community-driven project free of ownership, shareholders, promoters, directors and other centralised entities enforcing governance. KATDOG smart contracts are open-source, security audited, permanent, and entirely unchangable.

Serving strictly as a utility token in jurisdiction, KATDOG should not be considered a security or regulated token of any kind, and isn't categorised as a fiat/asset backed stablecoin.

Holders and traders of KATDOG claim to have read the correct technical, regulatory and legal advice prior to viewing this Whitepaper or the KATDOG website, thereafter accepting the inherent risk in accessing or using any form of blockchain or crypto technology, token, platform, and interface and further acknowledges with full disclaimer the full potential for loss and damages suffered.

KatDog

INTRODUCTION

KATDOG is redesigning the way decentralized finance is structured, focused on reshaping and evolving how DeFi concepts such as participation rewards, NFTs, and decentralized exchanges work while delivering the most robust ecosystem ever designed for DeFi's much-needed advancements.

KATDOG is leveraging the power of Defi concepts and, through our ecosystem, we offer huge tools for people around the world to take control of their financial future. KATDOG Ecosystem makes DeFi safer, more accessible and more rewarding with a circular ecosystem that aligns incentives for holders, rookies, traders, and developers.

KATDOG integrates:

\$KAD TOKEN

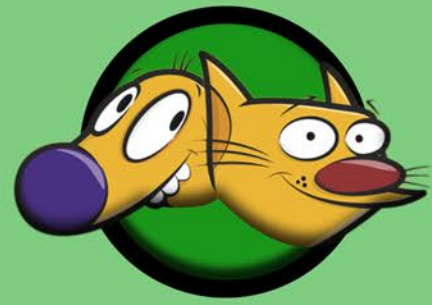

The meme token that facilitates and promotes widespread usage through a specific rewards initiative linked to user transactions through decentralized wallets.

KATDOG SWAP

Using decentralized exchanges with certain functionality allows holders to trade directly without the need for centralized governance

NET SUPPLY

1 QUINTILLION

HARD CAP

1200 BNB

SOFT CAP

600 BNB

PERSONAL MAX

5 BNB

PERSONAL MIN

0.01 BNB

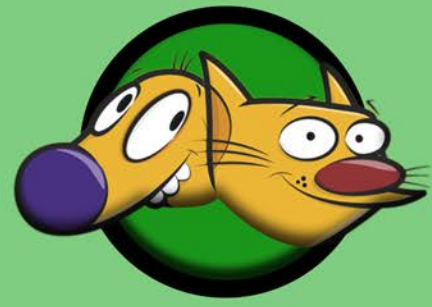

KATDOG'S projected net supply currently stands at 1 Quintillion, being prioritised as a decentralized usage rewards mechanism. The more \$KAD is actively in use, the more rewards are generated.

KATDOG offers investors a platform where they can increase their crypto earnings simply for holding \$KAD. The project uses a financial model and intelligent coding to deliver token reflection earnings to every holder. Moreover, the project integrates a fully self-sustaining model designed to increase the user base and build a strong community.

KATDOG maintains a robust fees model that charges multiple types of fees on all buy and sell trades. The tax from transactions is used to reward holders and fund marketing/development, ensuring the meme token takes flight.

ROADMAP

Q4 2021

- White Paper
- Website Launch
- Social Accounts
- Token Audit
- Token Sale
- PancakeSwap Listing
- Coinmarketcap & Coingecko Listing
- Ambassadors Application
- Huge Marketing Push
- Community Growth
- Ambassadors Announcement
- Further Exchange Listings

Q1 2022

- The KATDOG Swap
- Swap Contract Audit
- KATDOG Swap Public

Q3 2022

- KATDOG NFT Marketplace
- ETH Bridge

Q2 2022

- New Partnerships
- Web Re-design
- Community Events

THANKYOU!
